## OBJECTIVE

---

To perform outstanding work as a computer engineering within this organization by utilizing all of my analyze skill, communication skill and knowledge.

## EDUCATION

---

**Bachelor of Computer Engineering**, Chulalongkorn University

Expected 2025

GPA 3.58

Relevant Coursework: Computer Programming, Data structure, Computer Engineering Essential and Programming Methodology

## SKILLS

---

Programming Languages: Python, C++, Java, Golang, Javascript, Typescript, C#

Tools: Visual Studio Code, Visual Studio, Unity Engine, Scene Builder, Eclipse IDE

## PROJECTS

---

**VR Memory Project, Project in Metaverse Technology and Applications The Faculty of Engineering, Chulalongkorn University 2022**

- A project from metaverse club in Chulalongkorn University of implementing a meeting room that player has to memorize the color of the furniture in the room and change it to the correct one by using Unity Engine and Oculus Quest 2

**Student Planner, Final Project in Computer Engineering Essential, Chulalongkorn University, 2022**

- A website for students in Chulalongkorn University to adjust their schedule, homework and subjects by using Javascript and Firebase

**Golang Practice, Individual Study, 2022**

- Developed and maintained a Golang project that store the upcoming movie, making a bookstore using Golang, Postman

## EXTRA-CURRICULAR ACTIVITIES

---

- **CHULA EXPO 2022' Case Competition from ChulaExpo x Uniqlo** – Participated as a team of 5 to compete in competition
- **ChAMP Software Engineering Career Track** – Joined the campaign as a trainee, Learned more about software engineering and improved my skills.
