OBJECTIVE

To perform outstanding work as an computer engineering within this organization by utilizing all of my analyze skill, communication skill and knowledge.

EXPERIENCE

Software Engineer (Backend, Golang) Internship

1 June 2023 – 31 July 2023

Codefin Company Limited

- Implement new service with Go, gRPC and microservice architecture
- Implemented robust error handling mechanisms to ensure the stable of new added feature
- Contributed to the development of DIY/ROBO DCA feature
- Actively participated in team meetings to share knowledge and experience

EDUCATION

Bachelor of Computer Engineering, Chulalongkorn University

Expected 2025

GPAX 3.51

Relevant Coursework: Computer Programming, Data Structure, Computer Engineering Essential, Programming Methodology, Algorithm Design, Digital Comp Logic, Discrete Mathematics

TOEIC: 835

SKILLS

Programming Languages: Python, C++, Java, Go, JavaScript, TypeScript

Frameworks and Libraries: React, NextJS, ExpressJS, gRPC, Tailwind CSS

Tools: Visual Studio Code, MongoDB, DBeaver, BloomRPC, Docker, PostgreSQL, Firebase, SQL Server

PROJECTS

Student Planner, Final Project in Computer Engineering Essential, Chulalongkorn University, 2022

- A website for students in Chulalongkorn University to adjust their schedule, homework and subjects by using JavaScript and Firebase

HipDee (Backend), Individual Study II, The Faculty of Engineering, Chulalongkorn University 2022

- A project that works as a small team that is about developing website for the patient to check up with the doctor in area of orthopedic using ExpressJS and MongoDB.

EXTRA-CURRICULAR ACTIVITIES

- **ChAMP Software Engineering Career Track** – Joined the campaign as a trainee, Learned more about software engineering and improved my skills.
- **Intania Case Competition 2023** – Collaborated in a team of 4 to devise a 10-year profit solution for SC Asset while analyzing company and client data and engaging in group discussions to develop mutually beneficial solutions.
