OBJECTIVE

To perform outstanding work as an computer engineering within this organization by utilizing all of my analyze skill , communication skill and knowledge.

EDUCATION

Bachelor of Computer Engineering, Chulalongkorn University   Expected 2024
GPA 3.58
Relevant Coursework: Computer Programming, Data structure, Computer Engineering Essential, Programming Methodology, Algorithm Design, Digital Comp Logic, Discrete Mathematics

SKILLS

Programming Languages: Python, C++, Java, Golang, Javascript, C#
Tools: Visual Studio Code, Visual Studio, Unity Engine, Scene Builder, Eclipse IDE, MongoDB, Pandas, Matplotlib

PROJECTS

VR Memory Project, Project in Metaverse Technology and Applications, The Faculty of Engineering, Chulalongkorn University 2022
-   A project from metaverse club in Chulalongkorn University of implementing a meeting room that player has to memorize the color of the furniture in the room and change it to the correct one by using Unity Engine and Oculus Quest 2

Student Planner, Final Project in Computer Engineering Essential, Chulalongkorn University, 2022
-   A website for students in Chulalongkorn University to adjust their schedule, homework and subjects by using Javascript and Firebase

Covid in Thailand and the world, Project in Computer Programming, The Faculty of Engineering, Chulalongkorn University 2021
-   A project from computer programming that is about analyzing and presenting ideas of how the covid cases were in 2021 using Pandas and Matplotlib.

EXTRA-CURRICULAR ACTIVITIES

-   **CHULA EXPO 2022' Case Competition from ChulaExpo x Uniqlo** – Participated as a team of 5 to compete in competition
-   **ChAMP Software Engineering Career Track** – Joined the campaign as a trainee, Learned more about software engineering and improved my skills.
